SECTION 4 – FIRST AID MEASURES

No acute or chronic health effects known in workers arising from short or long term exposure to this product.

(a) Description of first aid measures:

- Ingestion: Non-toxic. There are no known health effects resulting from accidental ingestion of small amounts that may occur during normal handling. Ingestion of larger amounts may cause abdominal discomfort due to abrasiveness. Seek medical attention if symptoms develop.
- Eye contact: Particle and dust exposure may cause eye irritation due to abrasiveness. Flush with plenty of clean water for at least 15 minutes or until particles are removed. Seek medical attention if irritation or soreness persists.
- Skin contact: There are no known health effects from skin contact that may occur during normal handling. Seek medical attention if symptoms develop. Contact with material under pressure will damage skin by abrasion. Clean and dress any open wounds and seek medical attention.
- Inhalation: Exposure to dust created by use as a blast cleaning media may cause throat and lung irritation, coughing or shortness of breath. Move to fresh air and blow nose to remove particulates from nasal passages. Seek medical attention if symptoms persist.

(b) Most important symptoms and effects, both acute and delayed:

- Ingestion: No specific symptoms noted.
- Eye contact: No specific symptoms noted.
- Skin contact: No specific symptoms noted.
- Inhalation: No specific symptoms noted.

SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

- (a) Control parameters/Exposure Standards:

Crystalline silica (quartz) respirable dust: 0.1 mg/m³ TWA (time weighted average) may be exceeded when the product is used for dry blast cleaning, depending on material being blasted (respirable dust is ≤ 7 microns particle equivalent aerodynamic diameter).

Total dust (inspirable): 10 mg/m³ TWA

- (b) Appropriate engineering controls:

Maintain ventilation and/or dust collection to reduce exposure to dust generated during handling, use and clean-up. Maintain a clean and safe work environment and monitor effectiveness.

- (c) Individual protection measures:

Follow local, state or federal guidelines for the use of personal protection equipment. Blast cleaning operations should use an air fed abrasive blast hood conforming to relevant standards as well as leather (or equivalent) gloves and apron when in use. Hearing protection should also be worn when blast cleaning.
